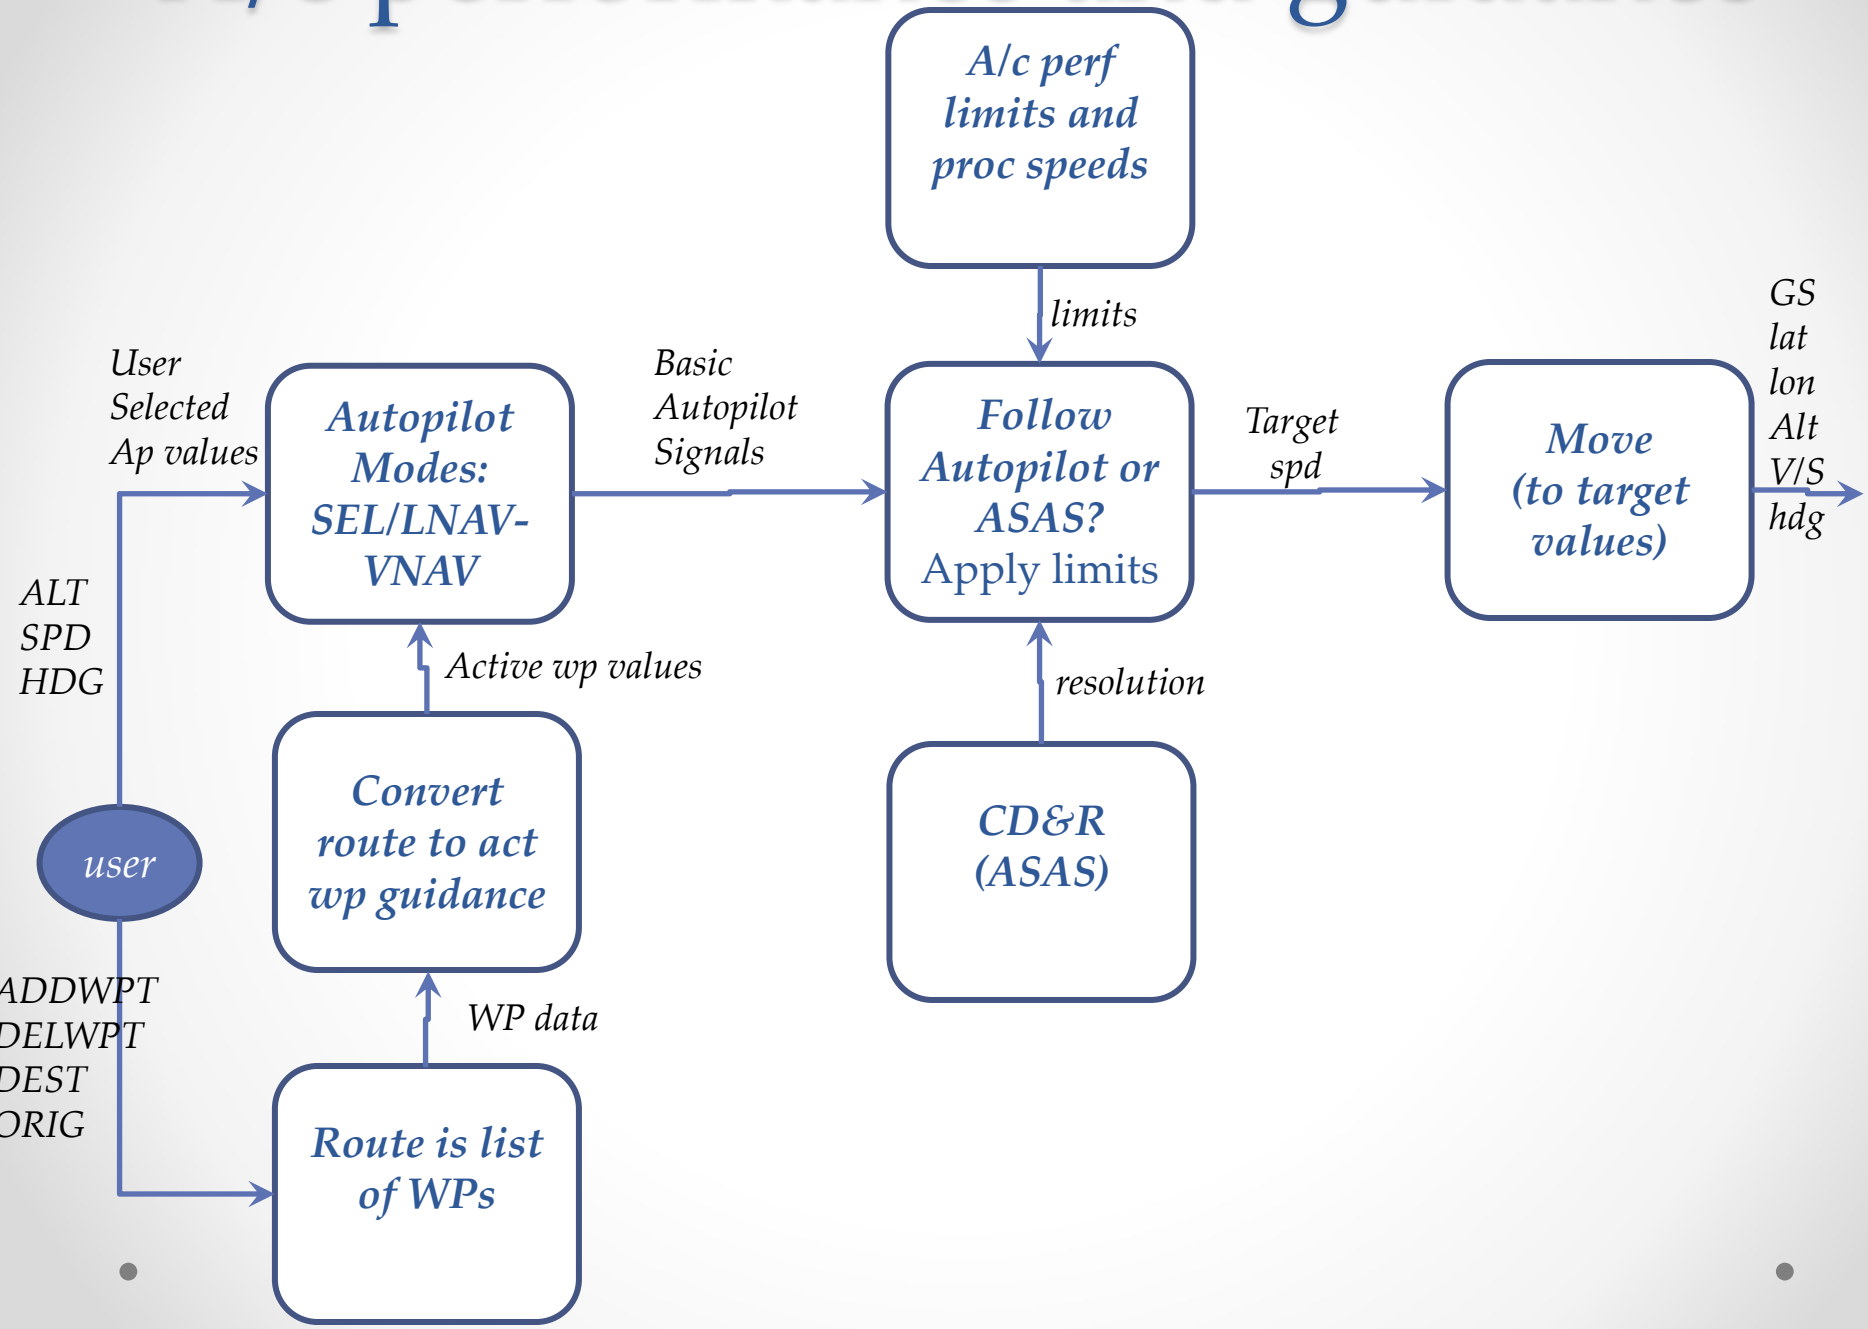
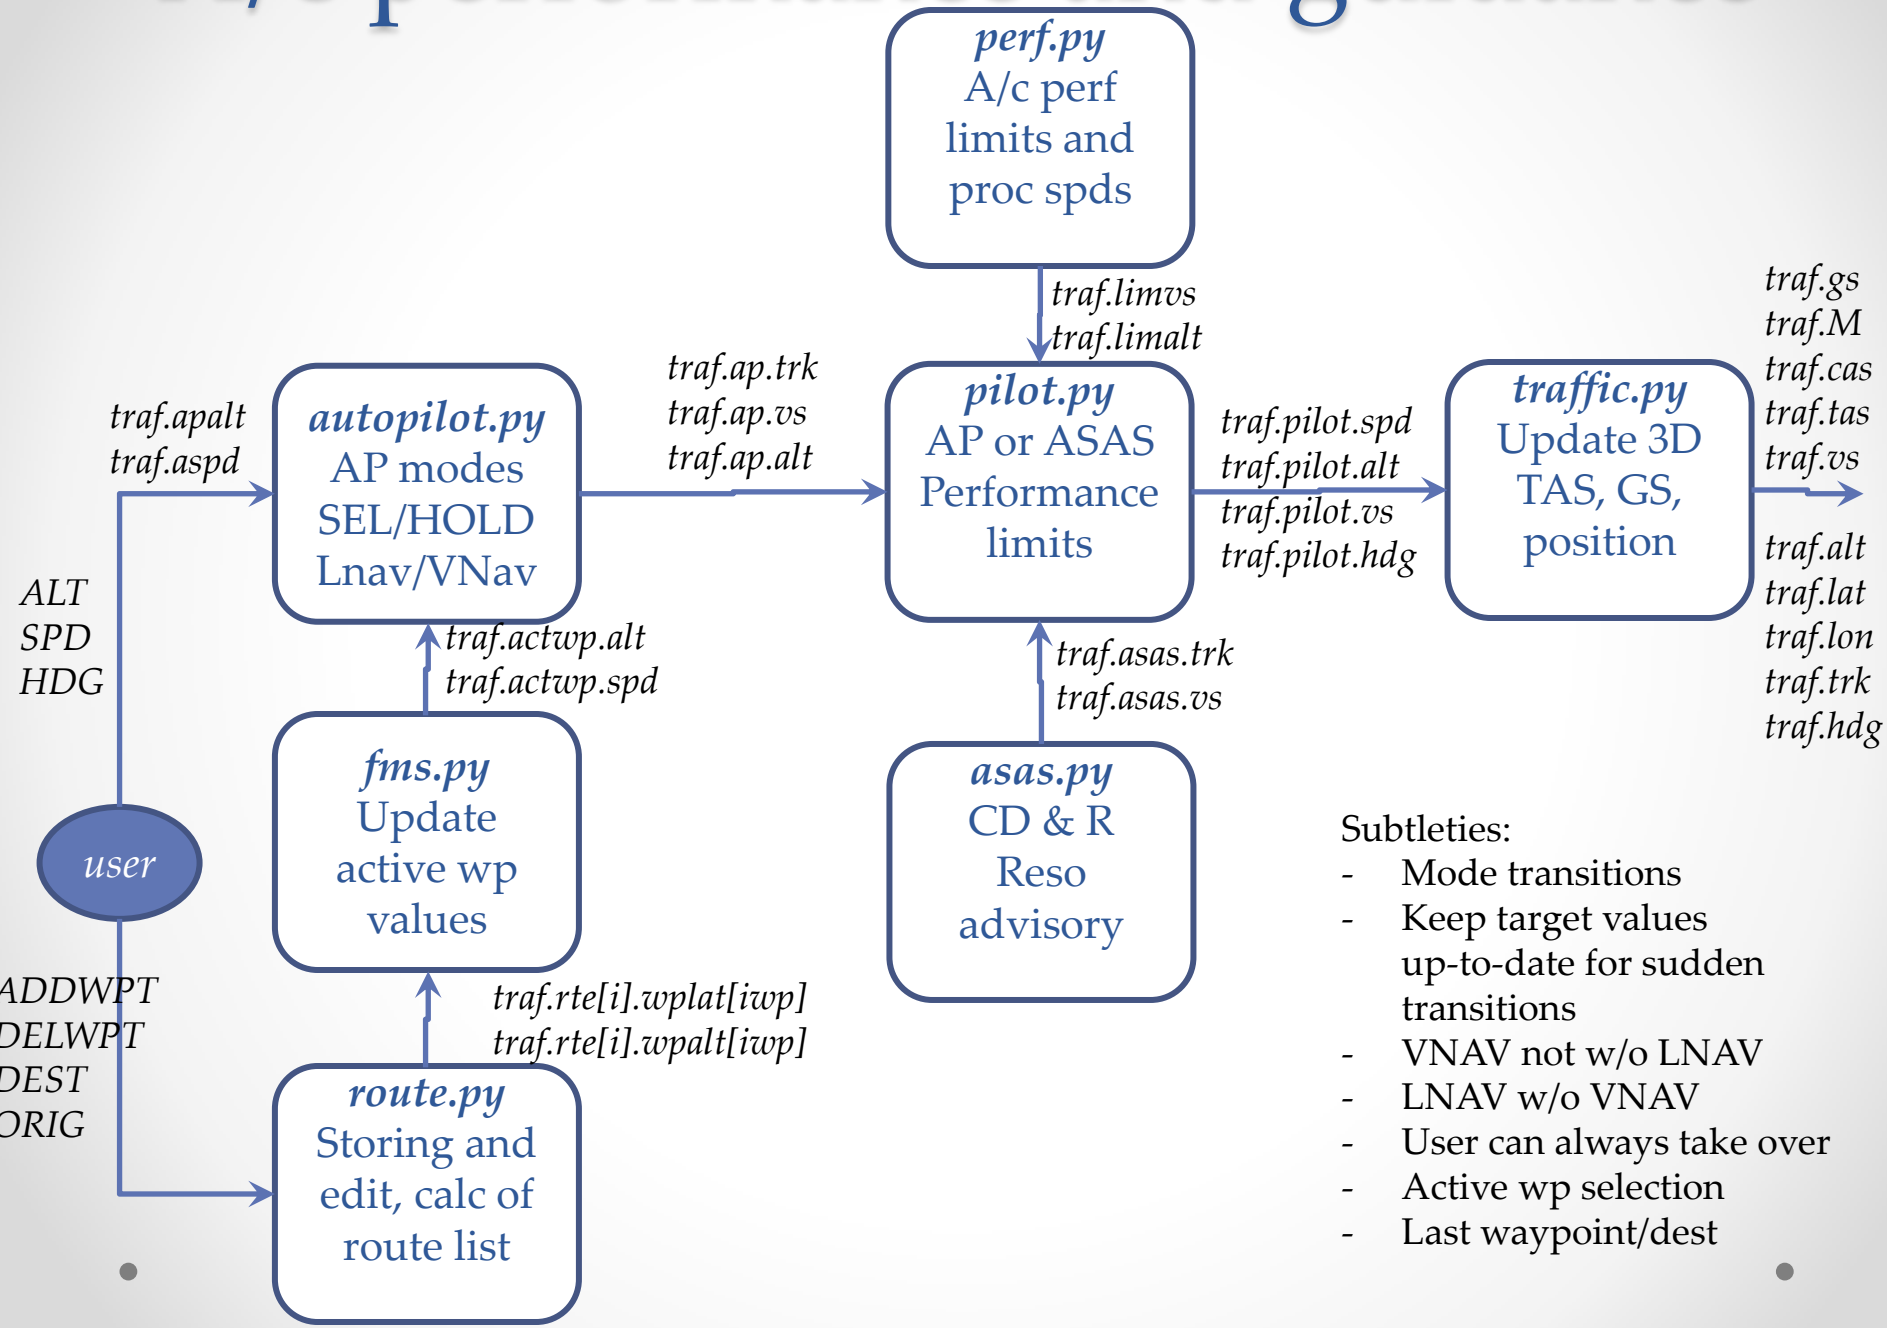
A/c performance and guidance



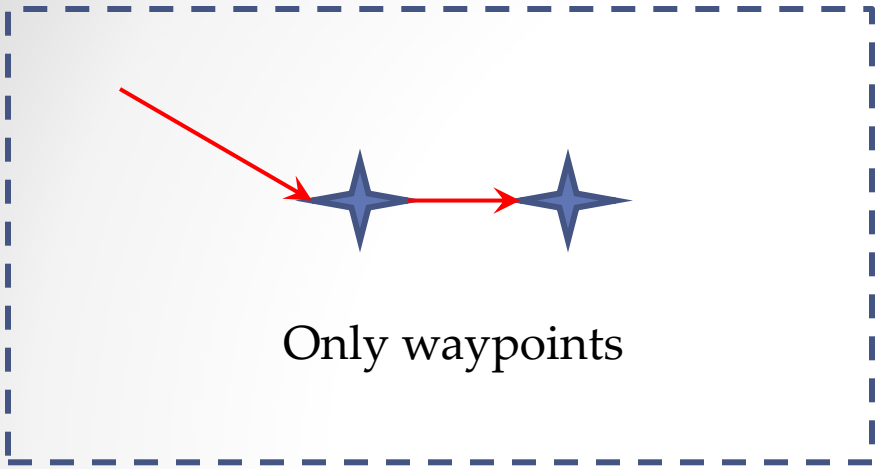
A/c performance and guidance



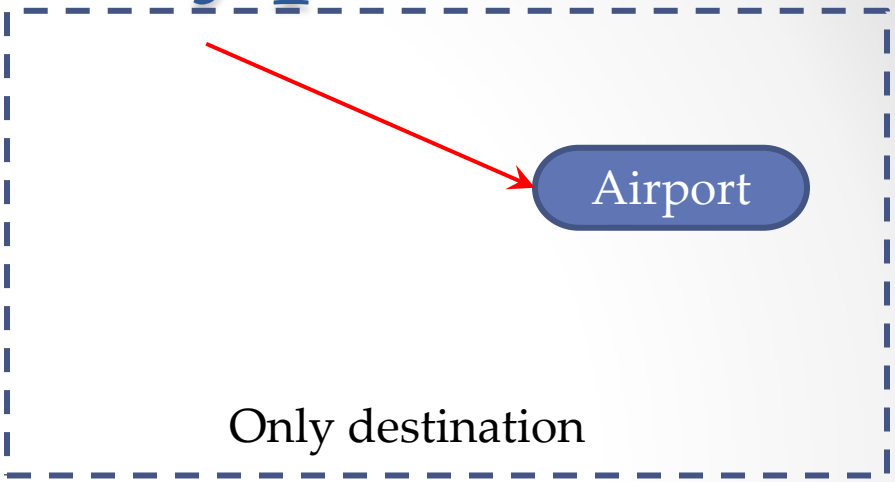
Subtleties:

- Mode transitions
- Keep target values up-to-date for sudden transitions
- VNAV not w/o LNAV
- LNAV w/o VNAV
- User can always take over
- Active wp selection
- Last waypoint/dest

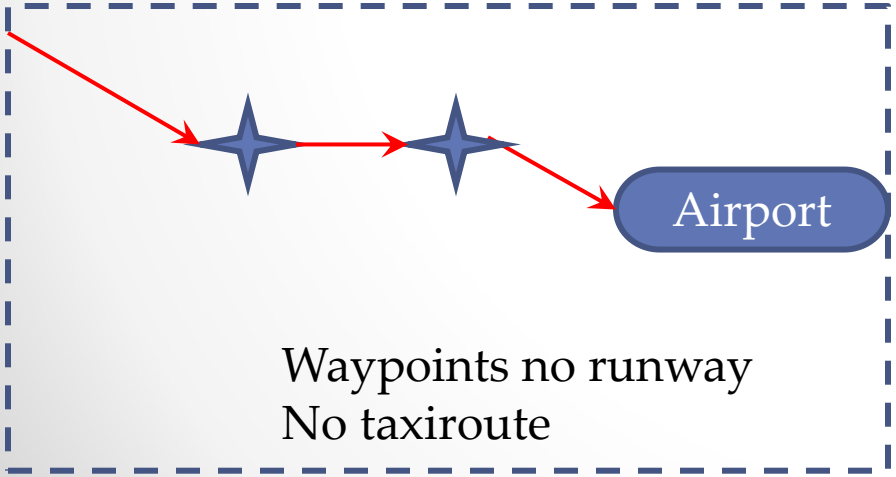
Dest/ last waypoint



Only waypoints

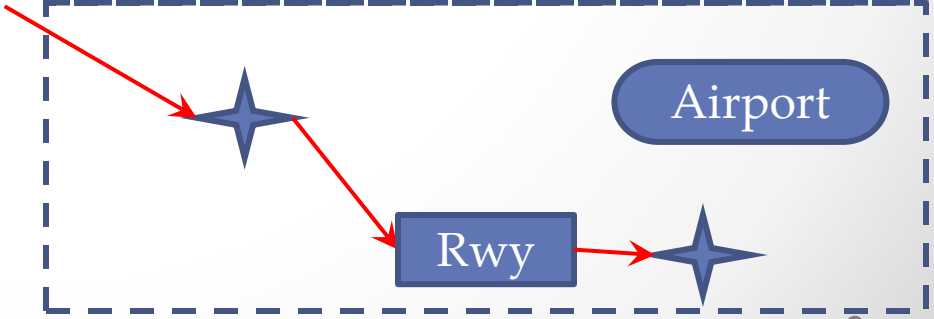


Only destination



Waypoints no runway
No taxiroute

Runway at same airport in route



Note: runway can be used as a normal waypoint

Note: Transitions and where to addwpt?
